Update on Internet-based RMP submissions

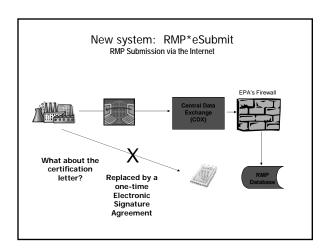

Robert Lucas EPCRA/RMP Enforcement Coordinator

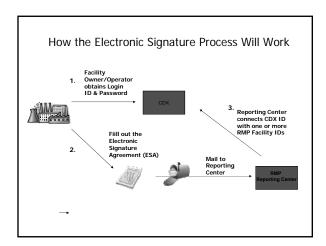

January 2009

U.S. EPA Pacific Southwest Region Emergency Prevention and Preparedness

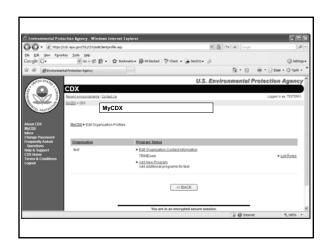

Steps to set up RMP access for a facility

- Certifier sets up CDX account
- · Add Program choose RMP
- Add Role: certifier or preparer
- · Certifier role is confirmed only after ESA is processed
- · Preparer role is confirmed when access code is entered
- Certifier enters ESA via online form
- ESA includes list of facilities belonging to the certifier
- Certifier downloads and signs the Electronic Signature Agreement
- ESA also signed by witness
- Certifier prepares cover letter on company letterhead
- Certifier sends ESA to the RMP Reporting Center (RC)
- The RC validates the ESA, sets up the database access
- RC gives the certifier an access code for a preparer to use
- Preparer sets up their own CDX account
- Preparers use the access code to enter RMP data for a facility

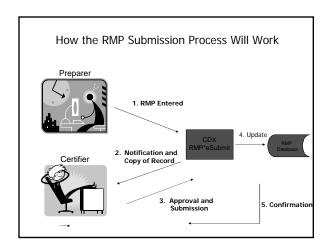

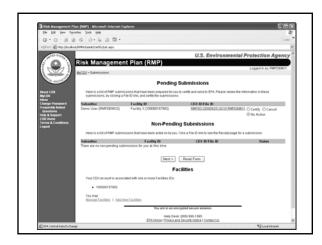

Transition to RMP*eSubmit

Can facilities continue to use RMP*Submit?

- RMP*Submit will be removed from our website
- No assistance in obtaining and using RMP*Submit will be provided
- Target date: February 2009 (to coincide with availability of the new system)
- Facilities can use the 2004 version if they have it
- $\bullet \quad \text{We will accept those submissions if they are without error} \\$
- Corrections will have to be made via RMP*eSubmit
- Exception: CBI

_

Schedule

- RMP*eSubmit alpha test (in-house) December 15 2008
- RMP*eSubmit beta test (selected facilities and preparers) January 15 2009
- RMP*eSubmit production system February 15 2009
- Accommodate CBI September 2009
- No longer accept submissions from RMP*Submit January 2010
